Introduction to QSE Token Purchase

Welcome to the QuantumSEC (QSE) Token purchase guide! Whether you're new to cryptocurrency or an experienced investor, this guide will help you successfully buy QSE Tokens with ease.

QSE Tokens power the QuantumSEC ecosystem, combining quantum-resistant cryptography with AI for next-generation blockchain security. Purchasing these tokens gives you access to our innovative platform and its growing applications.

What you'll learn in this guide:

- Setting up a secure cryptocurrency wallet
 - Adding funds to purchase tokens
 - Connecting to the QuantumSEC platform
 - Purchasing and verifying your QSE Tokens
-

Setting Up Your Wallet

To purchase QSE Tokens, you'll need a cryptocurrency wallet. We recommend **MetaMask** for its security, ease of use, and seamless integration with our platform.

Option 1: Set up MetaMask (Recommended)

1. Visit the [MetaMask Download Page](#) and install for your browser or mobile device.
2. Create a new wallet by following the on-screen instructions.
3. **IMPORTANT:** Securely record your 12-word Secret Recovery Phrase and never share it with anyone, including QuantumSEC support.

Option 2: Alternative Wallets

While MetaMask is our recommended wallet, you can also use:

- [Trust Wallet](#) - Mobile-friendly with an intuitive interface
- [Coinbase Wallet](#) - Easy integration with Coinbase exchange
- Any wallet that supports Ethereum-based tokens

For detailed wallet setup instructions, check the official documentation for your chosen wallet.

Need help? For a comprehensive MetaMask setup guide, visit the [official MetaMask documentation](#).

Adding Funds to Your Wallet

To purchase QSE Tokens, you'll need Ethereum (ETH) in your wallet. Here's how to add funds:

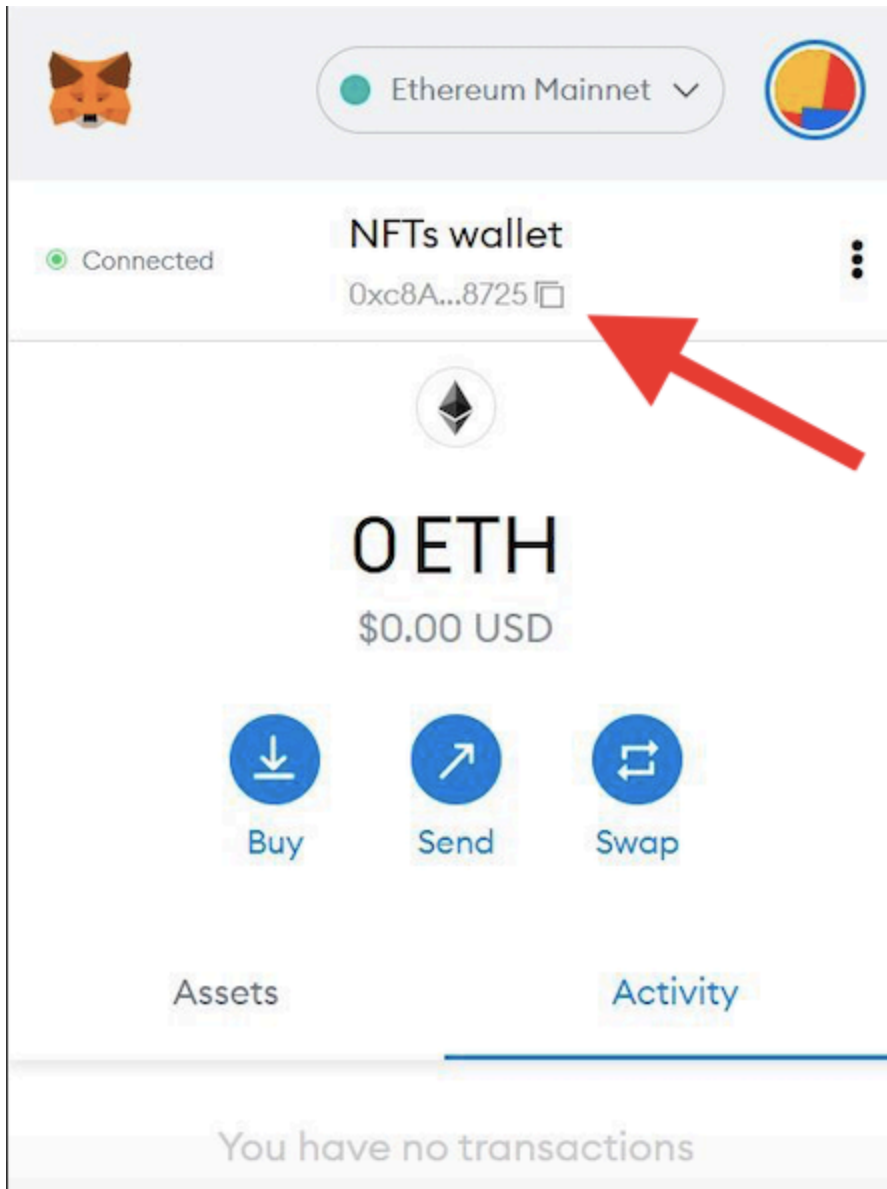

Step 1: Purchase ETH

You can buy ETH from cryptocurrency exchanges like:

- [Coinbase](#) - User-friendly for beginners
- [Binance](#) - Offers competitive fees
- [Kraken](#) - Secure and reliable

Step 2: Transfer ETH to Your Wallet

1. Copy your wallet address from MetaMask (the long string starting with "0x...").
2. In your exchange account, select Withdraw or Send ETH.
3. Paste your wallet address and specify the amount to send.
4. Confirm the transaction and wait for it to complete (typically 5-15 minutes).

Connecting to the QuantumSEC Platform

Now that your wallet is set up and funded, let's connect to the QuantumSEC platform to purchase QSE Tokens.

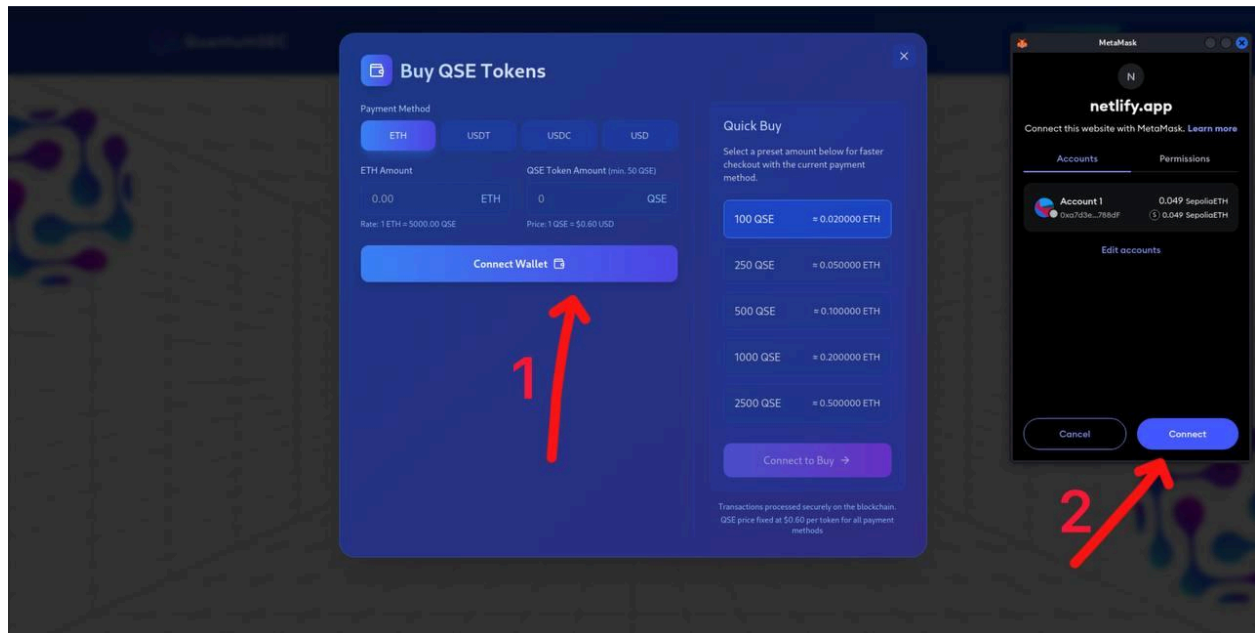

Step 1: Visit the QuantumSEC Website

1. Go to the QuantumSEC website.
2. Navigate to the "Buy QSE" section.

[Image Placeholder: QuantumSEC homepage with Buy QSE button highlighted]

Step 2: Connect Your Wallet

1. Click the "Connect Wallet" button.
2. Select MetaMask (or your chosen wallet) from the options.
3. Approve the connection request in your wallet's popup.
4. You'll see your wallet address appear on the site, confirming a successful connection.

Important: Always verify you're on the official QuantumSEC website before connecting your wallet.

Purchasing QSE Tokens

Now for the exciting part - purchasing your QSE Tokens!

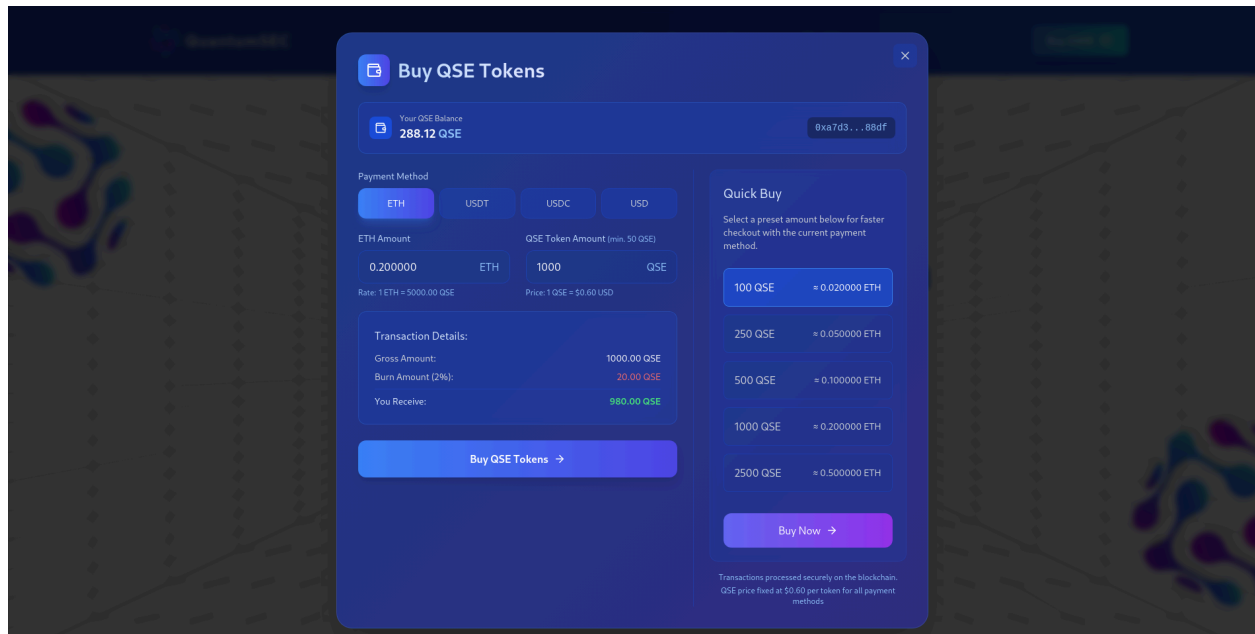

Step 1: Enter Purchase Amount

1. In the token purchase interface, you can enter either:
2. The amount of ETH you want to spend, or
3. The number of QSE Tokens you want to buy.
4. The system will automatically calculate the equivalent value.

Step 2: Review and Confirm

1. Review your purchase details, including:

2. Number of QSE Tokens
3. ETH amount
4. Network fee (gas fee)
5. Click the "Buy QSE Tokens" button.

Step 3: Approve the Transaction

1. Your wallet will prompt you to approve the transaction.
2. Verify the transaction details, especially the recipient address.
3. Confirm the transaction in your wallet.

Verifying Your Purchase

After purchasing QSE Tokens, it's important to verify your tokens are in your wallet.

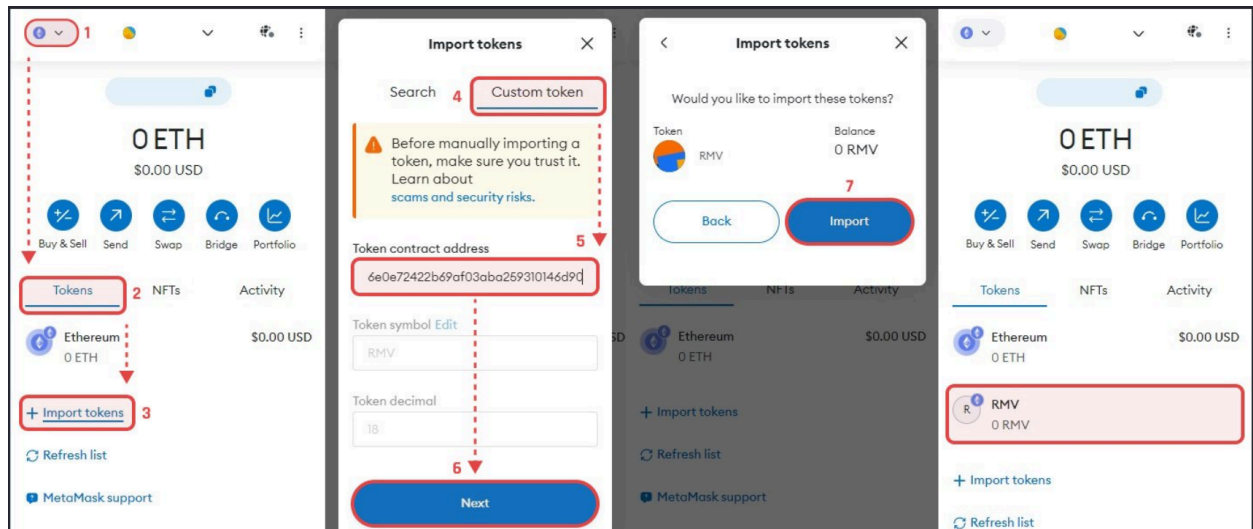

Step 1: Check Transaction Status

1. The QuantumSEC platform will display a "Purchase Successful!" message once the transaction is confirmed.
2. You can check the transaction details by clicking on the transaction hash link.

Step 2: Add QSE Token to Your Wallet

For MetaMask:

1. Open MetaMask and click "Import Tokens" at the bottom of the Assets tab.
2. Select "Custom Token" and enter:
 - **Token Contract Address:**
0x47cdE6190AE3718088Ca2305D97d0C622599b2F4
 - **Token Symbol:** QSE
 - **Decimals of Precision:** 18
3. Click "Add Custom Token" then "Import Tokens".

Step 3: View Your QSE Balance

1. Your QSE Tokens will now appear in your wallet's asset list.
2. The balance should reflect the number of tokens you purchased.

Troubleshooting & FAQ

Common Issues & Solutions

Transaction Pending Too Long

If your transaction is pending for more than 15 minutes:

- Check the network status for congestion.
- Consider speeding up the transaction by increasing gas fees through your wallet.

Wallet Connection Issues

If you're having trouble connecting your wallet:

- Refresh the page and try again.
- Ensure your wallet is unlocked.
- Clear your browser cache and restart your browser.

QSE Tokens Not Visible

If you don't see your tokens after a successful purchase:

- Double-check you've added the correct token contract address.
- Ensure you're viewing the correct network in your wallet.

Frequently Asked Questions

Q: Is my purchase secure?

A: Yes, all transactions occur directly on the blockchain. Always verify you're on the official QuantumSEC website before connecting your wallet.
