  -

## **\$QSE Month 25 and Beyond - Team Release**

- 100 million QSE released for the team

## **03. QSE Utility Token:**

- The utility of QSE Tokens supports the operational functionality of the QSE Ecosystem—such as powering AI Security Agent Bots, identity validation tools, and zero-trust data protection services.
- Market making QSE tokens enhances liquidity and supports integration with key infrastructure partners and exchanges (CEX/DEX). Also incentivizes validator onboarding and service interoperability.
- Marketing QSE tokens drive awareness, adoption, and community growth across enterprises, clean energy, supply chain, logistics, finance and nonprofit sectors.
- Governance & Safeguards of QSE tokens promote transparency and long-term alignment with the project, many token ecosystems apply the following best practices after team tokens are released.
- Investment Fund of QSE tokens ensures capital reserve for long-term sustainability, strategic acquisitions, and enterprise deployment initiatives.
